Graham Alexander Noblit, Ph.D.

747-466-0574 · GrahamNoblit@pm.me · www.linkedin.com/in/graham-noblit/

Adaptable & curious Senior Data Scientist (6+ years exp.) with expertise in statistics, machine learning, and artificial intelligence. Excels in mentorship & leadership roles and at designing & managing collaborative and solo projects.

SKILLS

Engineering: Python, R, Julia, SQL, Linux, Git, Docker

Domain: Machine Learning; Artificial Intelligence; Generative AI, Transformers, & Large Language Models; Econometrics (Regression) & Statistical Inference (Bayesian); Causal Inference & Experimental Design (A/B Testing); Natural Language Processing (NLP); Optimization; Data Visualization

PROFESSIONAL EXPERIENCE

Children's Hospital: Los Angeles   Los Angeles, CA
Senior Data Scientist, Team Lead   September 2023 – Present

- Implement machine learning and statistical pipelines for clinical research and practice
- Supervise team of data scientists: determining team's project involvement and defining project objectives and plans of completion; develop team's skills by providing tutorials on recent advances in machine learning and AI
- Improve clinical note classification by 35%, designing large language model/GenAI pipelines using information extraction, self-supervised training, semantic-search using vector databases, & chain-of-thought fine-tuning
- Reduce experiment costs 10% by implementing machine learning & Bayesian regression to salvage datasets
- Deliver recommendations on large language models/generative AI to audience of 100+ administrators, researchers, and clinicians; talk received highest rating in history of speaker series
- Audit genomics machine learning pipeline, correcting errors and redefining project-scope and data-collection using Bayesian mixture models, hierarchical clustering & community detection, and hypothesis testing

Schwartz Reisman Inst. for Technology & Society; Vector Inst. for Artificial Intelligence   Toronto, ON
Research Scientist   September 2022 – September 2023

- Designed game-theoretic optimization models & simulations for cooperative multi-agent reinforcement learning
- Provided econometric and statistical consultation for data-collection for study of opinion expression
- Led weekly meetings of 15 people, planning and developing themes and speakers for multi-disciplinary artificial intelligence conference (100+ attendees); mentored a Ph.D. student

Independent Research Consultant   August 2019 – September 2023

- **DeepMind** (AI): Provided disciplinary expertise, co-designing novel reinforcement learning algorithm
- **University of Chicago School of Business**: Scraped and created datasets; performed statistical analyses (mixed models regression and spatial regressions) included in scientific publications
- **Rare** (global nonprofit): Devised research and data collection procedures for project on fishery sustainability and behavioral change in the Brazilian Amazon

Harvard University   Cambridge, MA
Doctoral Researcher   August 2016 – May 2022

- Produced three scientific articles explaining human social and economic behavior using spatial regression, causal inference, linear and non-linear dimensionality reduction, and game-theoretic optimization
- Scraped, cleaned, and merged four spatial and non-spatial, large and small, datasets using climatic, agricultural, economic, and survey data

Teaching Fellow   August 2018 – July 2021

- **Statistics,** Head Teaching Fellow: supervised teams of 5-9 teaching assistants and led classes of 20+
- Taught data-science & R: hypothesis testing, model selection, and interpreting & presenting results

EDUCATION

Harvard University, Ph.D. in Human Evolutionary Biology, Cambridge, MA   May 2022
University of Texas at Austin, B.A. in Anthropology, Minor in Mathematics, Austin, TX   May 2012
